PROFESSIONAL SUMMARY

Civil engineer who builds AI solutions for construction and development workflows. Over 4 years in site civil design, land development and project management, working directly with developers, contractors, consultants and permitting agencies on drawings, construction documents, schedules and cost data. At Nexco Properties, took AI tools from requirements to working builds using LLM agents (Claude Code): a design-guide generator that structures county manuals, agency standards and developer agreements into one project-specific reference; drainage design calculators; and a pipeline that turns DWG/DWF drawings into quantity takeoffs. Strong in translating construction workflows into technical requirements, running concurrent workstreams without formal authority, and explaining technical work clearly to senior decision-makers.

SKILLS

AI Solutions: LLMs & AI Agents (Claude Code), Prompting & Spec-Driven Development, Document Parsing & Requirements Extraction, Structuring Multi-Source Construction Data, CAD Data Pipelines (DWG/DWF), Data Quality & Validation, Automated Testing

Construction Domain: Site Civil & Drainage Design, Feasibility Studies, Entitlements & Permitting, Construction Documents & Plan Review, Quantity Takeoffs & Cost Estimating, Construction Draw Schedules, QA/QC, Multi-Agency Coordination

Program & Project Delivery: Requirements Gathering, Workflow Mapping, Requirements-to-Production Delivery, Concurrent Workstream Management, Cross-Functional Execution, Stakeholder Management, Risk Assessment, KPI Reporting

Tools: AutoCAD Civil 3D, Bluebeam Revu, HydroCAD, GIS, Power BI, Microsoft Excel (Advanced), Git/GitHub, Unity, C#

Communication: Technical Writing, Executive & Stakeholder Presentations, Postmortems & Retrospectives

PROFESSIONAL EXPERIENCE

Senior Civil Designer | Nexco Properties | Houston, TX | *Dec 2024 – Present*

- Mapped repetitive, expert-heavy design and estimating work in the company's development workflow and turned it into AI solutions built with LLM agents (Claude Code), taking each from requirements to a working internal tool.
- Built a design-guide generator that reads county drainage manuals, outside-agency requirements and in-house developer agreements, structuring those separate sources into a single project-specific design guide for each new site.
- Built a pipeline that reads DWG/DWF drawings and runs quantity takeoffs automatically, replacing manual takeoff work for cost estimating.
- Built weir, channel and flow calculators for day-to-day drainage design.
- Scoped an integration to generate DWG files from the design guide and estimator; diagnosed data-quality failures (file-conversion errors, misread CAD layers) and documented them to set requirements for the next iteration.
- Lead zero-level feasibility and schematic site design for commercial and residential developments, with project and real estate management responsibilities across consultants, contractors, agencies and internal teams.

Civil Designer | Elevation Land Solutions | Houston, TX | *Jul 2023 – Nov 2024*

- Produced full construction document sets and ran multi-round review cycles with developers, contractors and permitting agencies, resolving stakeholder comments to hold delivery deadlines.
- Translated hydrological, topographic and geospatial models into clear reports for non-technical stakeholders, and applied structured QA/QC workflows across multi-agency reviews.
- Prepared proposals, engineer's estimates and quantity takeoffs in Bluebeam and Excel.

Land Development Analyst | Camden Homes | Dallas, TX | *Jul 2022 – Mar 2023*

- Conducted feasibility studies and cost-benefit analyses for developments valued at $8M–$20M, supporting pro formas and construction draw schedules.
- Built Power BI dashboards tracking construction pacing, budget burn rate and return thresholds for leadership reviews.

Operations | Chase World Travel (Family Business) | Houston, TX | *May 2020 – Jun 2022*

INDEPENDENT AI DEVELOPMENT PROJECTS

AI-Agent Software Production | Claude Code, C#, Unity | *2024 – Present*

- Delivered three software projects with AI agents, including a four-player online multiplayer application taken from written spec to a full working build in one week, gated by 1,600+ automated tests.
- Designed a staged human-review process for agent-built work (each phase reviewed while the next builds, then reconciled) and published postmortems on where agentic development succeeds and fails.

EDUCATION

Bachelor of Science, Civil Engineering | Texas A&M University | College Station, TX | 2020

LANGUAGES

English (Native), Urdu (Fluent), Hindi (Fluent)
