FICTIONAL DEMONSTRATION DOCUMENT. All names, sites, values and criteria are invented. Not for construction or professional use.

LIMITED PHASE II ENVIRONMENTAL SITE ASSESSMENT

Halden Prairie Tract, Northeast Corner

Prepared by Tallgrass Environmental

September 10, 2026

1.0 INTRODUCTION

This investigation evaluates the recognized environmental condition identified in the Phase I.

FICTIONAL DEMONSTRATION DOCUMENT. All names, sites, values and criteria are invented. Not for construction or professional use.

3.0 FIELD ACTIVITIES

Borings were advanced using direct-push methods.

FICTIONAL DEMONSTRATION DOCUMENT. All names, sites, values and criteria are invented. Not for construction or professional use.

APPENDIX

Boring logs and laboratory reports (not reproduced in text).

FICTIONAL DEMONSTRATION DOCUMENT. All names, sites, values and criteria are invented. Not for construction or professional use.

TABLE OF CONTENTS

1.0 INTRODUCTION

This investigation evaluates the recognized environmental condition identified in the Phase I.

5.1 SOIL ANALYTICAL RESULTS

Soil samples were collected from eight borings. Laboratory results show that total petroleum hydrocarbon concentrations in borings B-3 and B-4 exceed residential screening levels. The affected area is estimated at approximately 0.6 acres surrounding the former tank locations.

FICTIONAL DEMONSTRATION DOCUMENT. All names, sites, values and criteria are invented. Not for construction or professional use.

APPENDIX

Boring logs and laboratory reports (not reproduced in text).

5.2 GROUNDWATER ANALYTICAL RESULTS

Temporary monitoring wells were installed in borings B-3, B-4 and B-6. The groundwater samples did not exceed applicable action levels.

1.0 INTRODUCTION

This investigation evaluates the recognized environmental condition identified in the Phase I.

FICTIONAL DEMONSTRATION DOCUMENT. All names, sites, values and criteria are invented. Not for construction or professional use.

7.0 RECOMMENDATIONS

To allow residential use of the affected area, excavation and off-site disposal of approximately 1,450 cubic yards of impacted soil is recommended, followed by confirmation sampling and submittal of a closure report to the state environmental agency.

FICTIONAL DEMONSTRATION DOCUMENT. All names, sites, values and criteria are invented. Not for construction or professional use.

APPENDIX

Boring logs and laboratory reports (not reproduced in text).

FICTIONAL DEMONSTRATION DOCUMENT. All names, sites, values and criteria are invented. Not for construction or professional use.
